

The PREMIER EDITION

With more luxury, more comfort and more speed,
it's not just a new DA40 XLS - it's the *ultimate* DA40 XLS.

With its combination of

smooth handling, Garmin G1000 avionics, low cost of ownership and unmatched safety record, the Diamond DA40 XLS is already recognized as "one of the best 4-place airplanes you can buy." But the Premier Edition, developed and offered exclusively by Premier Aircraft Sales, kicks everything you owners and pilots love about the DA40 XLS up a notch.

More Luxury

The Premier Edition features Premier Comfort seats with upgraded top-quality leather upholstery and deeper, form fit foam padding. The luxurious interior also includes stylish headrest embroidery, complementary color piping and upgraded carpeting.

More Comfort

The Premier Edition Package II gives you the unparalleled comfort of Premier's exclusive CabinCool™ air conditioning system. Plus, the Premier Edition Packages I and II also feature Premier's PowerPlus standby alternator for the added confidence of full electrical redundancy.

More Speed

The Premier Edition features the new Hartzell Advanced Structural Composite (ASC) propeller. It doesn't just look cool - it's lighter, smoother, adds a couple knots to the Premier Edition's cruise speed and delivers better climb rate. It all adds up to performance improvements you'll feel on your first flight.

More Styling

To give your new Premier Edition DA40 XLS the outstanding ramp presence you'd expect, it features a distinctive exterior striping package in your choice of standard colors.

GET YOUR DA40 READY TO BEAT THE SUMMER HEAT

Premier's **CabinCool** air conditioning system is available as an aftermarket retrofit for any Garmin G1000-equipped, Lycoming-powered DA40. Premier is also your source for a host of other DA40 aftermarket upgrades including our **PowerPlus** standby alternator and **LoPresti Boom Beam** HID lighting.
